DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim(s) 1-23, drawn to an acoustic transducer for measuring a property of a fluid, classified in class 73, subclass 632.
 - II. Claim(s) 24-27, drawn to a sampling system with a flow meter including an acoustic transducer, classified in class 73, subclass 861.18.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the use of an acoustic transducer. The subcombination has separate utility such as testing any fluid wall and does not have to be apart of a sampling system.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
